*Note: The 2012 US Power Industry Wall Map was created using MAPSearch's Electric Power database (current as of February 2012), and was verified using the best available sources at that time. This map is intended to be correct, and is intended to include all operational and proposed power plants (50 MW and above). However, data sources and interpretation may vary. We welcome any input that will improve the accuracy of our maps.*

*Full power plant information found on this map can be licensed in GIS format from MAPSearch. Our data is updated quarterly, and offers the most accurate asset information for North American power plants, transmission lines, and substations.
